First announcement

Joint FMU-ICRP Workshop on *Radiological Protection in Medicine*

Fukushima Medical University
Tuesday, October 3, 2017

Organised by Fukushima Medical University (FMU) and the International Commission on Radiological Protection (ICRP) with support from the Nippon Foundation

Supported by [The Nippon Foundation](http://www.terraform.org)

**Background**

Fukushima Medical University is under development of radiopharmaceuticals for targeted $\alpha$-particle therapy. Radionuclide therapy combines therapeutic effect of radiation with the targeting capability of molecular therapies and is increasingly being utilised as the result of ongoing development of novel radionuclides and tracer molecules. ICRP Task Group 101 has been working on Radiological Protection in Therapy with Radiopharmaceuticals for providing recommendations related to radiological protection of patients and staff as well as of public. It is important to alert the medical community of optimising therapeutic use and protection required for radiopharmaceuticals, particularly for new treatment procedure such as targeted $\alpha$-particle therapy. This joint workshop provides an opportunity to exchange information between FMU and ICRP on the advanced scientific findings for the protection of people from the risks of radiation.

**Objectives**

FMU and ICRP welcome this opportunity to share information on radiation protection in medicine including radionuclide therapy with ICRP Task Group 101 members and medical community.

**Registration**

Attendance at the symposium is free of charge. However, advance registration is required as attendance is limited to 100 participants. Please send your name, affiliation, and e-mail address to Haruyuki Ogino (ICRP Assistant Scientific Secretary) at rpmed@icrp.org by 22 September 2017.

**Venue**

Room number 1, the 2nd floor of Bldg. 7, Fukushima Medical University
10:00 – 10:05: Opening Address
Koichi Tanigawa (FMU, Japan)

10:05 – 11:00: Session 1 “General Overview and Introduction from FMU”
Radiological Protection in Medicine
Yoshiharu Yonekura (QST, Japan)
Presentation of New Treatment Facility in FMU
Noboru Oriuchi (FMU, Japan)

11:00 – 12:00: FMU Facility Tour (Advanced Clinical Research Center, FMU)

12:00 – 13:30: Lunch

Individual Risk Estimates in Radiology: Is it necessary and possible?
Sören Mattsson
(Skåne University Hospital Malmö and Lund University, Sweden)
Pediatric Phantom for Dosimetry Calculation
Wesley Bolch
(University of Florida, USA)

14:30 – 15:00: Coffee break

15:00 – 16:00: Session 3 “Radiological Protection in Radionuclide Therapy”
Individualized Treatment Planning in Radionuclide Therapy
Glenn Flux (Royal Marsden Hospital, UK)
Current Status on Radionuclide Therapy
Makoto Hosono (Kindai University, Japan)

16:00 – 16:40: Panel Discussion

16:40 – 16:50: Closing Remark
