We are pleased to announce the 8th GCB Biomedical Science and Engineering Symposium, scheduled to take place online from the 22nd to 23rd of March, 2022, organized by the Global Center for Biomedical Science and Engineering, Faculty of Medicine, Hokkaido University.

The symposium will feature presentations by internationally renowned researchers from world-leading institutions in the field of radiation science including Stanford University, University of Pennsylvania, University of Oxford, Hokkaido University and so on over the two days.

The program consists of the following sessions:

- 1. Clinical Radiotherapy for Central Nervous System
- 2. Nuclear Medicine and Radiotherapy
- 3. Proton Medical Physics
- 4. Radiation Biology
- 5. Diagnostic Imaging
- 6. Special Lecture by Prof. Amato Giaccia
